

Continuous Monitoring in the Ward

Publications Reference List 2021

Key literature on continuous ward monitoring

Michard, F., Khanna, A. (2020). Continuous Monitoring Beyond the ICU: The rise of mobile solutions. *ICU Management & Practice* 4, 297-299.

Sessler, D., Saugel, B., (2019). Beyond 'failure to rescue': the time has come for continuous ward monitoring. *British Journal of Anaesthesia*, 122 (3): 304-306.

Vincent, J-L., *et al.*, (2019). Improving detection of patient deterioration in the general hospital ward environment. *Eur J Anaesthesiol*, 35: 325-333.

Michard, F., *et al.*, (2019). The rise of ward monitoring: opportunities and challenges for critical care specialists. *Intensive Care Med*, 45(5): 671-673.

Michard, F., *et al.* (2019). Protecting ward patients: The case for continuous monitoring. *ICU Management & Practice* 1, 32-35.

Bates, D.W., *et al.*, (2015). Finding patients before they crash: the next major opportunity to improve patient safety. *BMJ Quality & Safety*, 24:1-3.

Khanna, Ashish, *et al.*, (2019). Automated continuous noninvasive ward monitoring: future directions and challenges. *Crit Care*, 23(1):194.

Michard, F., Sessler, D., (2018). Ward monitoring 3.0. *Br J Anaesth*, 121(5):999-1001.

Respiratory rate monitoring

Semler, M.W., *et al.*, (2013). Flash mob research: a single-day, multicenter, resident-directed study of respiratory rate. *Chest*, 143(6):1740-1744.

Loughlin, P.C., *et al.*, (2018). Respiratory Rate: The Forgotten Vital Sign – Make It Count! *Jt Comm J Qual Patient Saf*, 44(8) 494-499.

Cretikos, M. *et al.*, (2008). Respiratory rate: the neglected vital sign. *MJA*, 188(11):657-659.

Keir E. J., *et al.*, (2015). The accuracy of respiratory rate assessment by doctors in a London teaching hospital: a cross-sectional study. *J Clin Monit Comput*, 29:455-460.

Foundational papers on adverse events in wards – shortcomings of current care practices

Eddahchouri, Y., *et al.*, (2020). Low compliance to a vital sign safety protocol on general hospital wards: a retrospective cohort study. *International Journal of Nursing Studies*.

Portuondo, J., *et al.*, (2019). Failure to Rescue as a Surgical Quality Indicator. *Anesthesiology*, 131(2): 426-437.

Sun, Z., *et al.*, (2015). Postoperative hypoxemia is common and persistent: a prospective blinded observational study. *Anesth Analg*, 121: 709-15.

Curry, J., Jungquist, C., (2014). A critical assessment of monitoring practices, patient deterioration, and alarm fatigue on inpatient wards: a review. *Patient Safety in Surgery*, 8:29.

Nolan, J., *et al.*, (2014). Incidence and outcome of in-hospital cardiac arrest in the UK National Cardiac Arrest Audit. *Resuscitation*, 85(8):987-92.

Van Zanten AR, *et al.*, (2014). Guideline bundles adherence and mortality in severe sepsis and septic shock. *Crit Care Med*, 42:1890–8.

Pearse, R., *et al.*, (2012). Mortality after surgery in Europe: a 7 day cohort study. *Lancet* 380: 1059-65.

Churpek, M., *et al.*, (2012). Predicting Cardiac Arrest on the Wards, A Nested Case-Control Study. *Chest*, 141(5):1170-1176.

Abenstein, J., *et al.*, (2010). An Ounce of Prevention May Equate to a Pound of Cure. *Anesthesiology*, 112:272–3.

Daryl A Jones, D., *et al.*, (2011). Rapid-response teams. *N Engl J Med*, 365(2):139-46.

Clinical trials / case studies on outcomes

Escobar, G., *et al.*, (2020). Automated Identification of Adults at Risk for In-Hospital Clinical Deterioration. *The New England Journal of Medicine*, 383:1951-1960.

Cabalsa, Camille, (2018). Creating a Culture of Learning: Improving Patient Mobility in a Medical-Surgical Unit. *Master's Projects and Capstones* 844.

Brown, H., *et al.*, (2014). Continuous monitoring in an inpatient medical-surgical unit: a controlled clinical trial. *Am J Med* 127(3):226–232.

Slight, S. P. *et al.*, (2014). The return on investment of implementing a continuous monitoring system in general medical-surgical units. *Crit Care Med*, 42:1862–8.

Fisher, S. R., *et al.*, (2010). Early ambulation and length of stay in older adults hospitalized for acute illness. *Arch Intern Med*. 170(21):1942-1943.

Molina, J. A., *et al.*, (2014). Outcomes of direct and indirect medical intensive care unit admissions from the emergency department of an acute care hospital: a retrospective cohort study. *BMJ Open*. 4(11):e005553.
